**Attachments:** BaP Tox Review-post ERC-10-24-2016-clean copy-QAed figures.docx

Oh, yes, that would probably be ideal. I've replaced the figures in Section 2. Perhaps they can insert their updated figures in Section 1 (Figures 1-1, 1-3, 1-4, and 1-5). I'm not sure if Figure 1-6 was changed at all.

I'll attach the most recent tox review here.  
Thanks!

Also – I should have told you – we could always send this to SRC and tell them to put the graphics in the tox review.

Just a thought to save you time if you need it.

Ok I looked at a few ways to do this. One thing to do is to save entire workbook as an HTM file and that process saves every workbook as a png file. With these you can just "replace" the graphic in Word. Although I opened one and it seems a little blurry. What do you think?

Click on the picture then go to the picture tools menu and then choose "change picture" and you can just swap them out.

I'm not sure which way (cut and paste or swap) would make the best looking graphic.

Vicki

OK. I finally got it to open. It just took about 10 minutes!

I can't even get far enough to save! It just keeps saying it is opening, and I have closed the file repeatedly to try to open it again.

I usually just cut and paste as a figure.

Did you save as a figure then import into word? Are you just cutting and pasting?

Hi Vicki, I'm having trouble opening this excel file. It keeps freezing. Any suggestions? (I'm trying to paste the QA'ed figures into the revised tox review.)

Hi Vicki and Kathleen,

I have attached a list of questions/comments pertaining to the exposure response arrays for BaP and the corresponding draft arrays for EPA review. I would appreciate your technical direction regarding further revisions to these figures.

Thanks very much,

Julie
